Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the relationship of the structures to the function is unclear.

Likewise, in claim 3 the recitation " unused volumes" is unclear. In claim 4 there is no antecedent basis for "drawers".

In general the elements and their relationship to one another which make up this invention are not clearly described with sufficient clarity and antecedent basis to enable one of ordinary skill in the art to make and use this invention. It is also unclear whether a restriction requirement between one or more inventions is appropriate in that the claim format is indefinite. It appears that applicant wishes to claim a basket for use with a dishwashing machine, therefore the claim that appears to be claim 8 would be appropriate for restriction to another invention which would include the combination of a dishwashing machine and a basket for use in a dishwashing machine.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said

subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over AEG Hausgeraete EP1072221 A1. Hausgeraete teaches a basket 1 which is used in dishwashers and including a drawer 2 which slides on rails 3, 3'. The drawer is capable of holding utensils. Although the drawer 2 is positioned over the basket, there is no reason why the drawer could not be positioned underneath the basket as an alternative mechanical equivalent and a matter of design choice for one having ordinary skill in the art at the time of the invention.

In response to applicant's remarks and arguments:

The claims presented 7/5/09 do not overcome the 112 rejection by making the claims any clearer. The claims are still indefinite as to the structural relationship of the elements and their function. As pointed out above there is still insufficient antecedent basis for some of the elements claimed.

The examiner does not agree with applicants arguments regarding the prior art rejection. Applicant has argued what the references teach rather than the merits of the claims with respect to the teaching in the references.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
